EDUCATION

Tecnológico de Monterrey (ITESM)

B.S. in Computer Science and Technology – GPA: 3.7 / 4.0

Expected Graduation: June 2027

Monterrey, Nuevo Leon, Mexico

Relevant Courses:

- Advanced Data Structures & Algorithms
- Object-Oriented Programming
- Software Development & Implementation
- Software Analysis

Certifications: AWS Cloud Practitioner | Web Development Bootcamp (Udemy)

WORK EXPERIENCE

Software Engineer Intern

The Home Depot Mexico

Jan 2025 – Feb 2026

Monterrey, N.L.

- Engineered production modules for the SMS (Store Management System) serving **140+** store locations using C#/.NET, React, and SQL Server; designed UX/UI workflows in Figma validated through UATs with product owners.
- Replaced manual installation log with an automated tracking system, eliminating **100%** of manual data entry for orders, assignments, billing, status changes, and warranty data with full audit history.
- Developed **10+** SOAP and **20+** RESTful service integrations covering transfer exceptions, receipt confirmations, and RFC-based UPC synchronization via XML processing and Entity Framework.
- Delivered production features through Agile/Scrum sprints with deployments across DEV, QA, pilot stores, and nationwide rollout using Azure DevOps CI/CD pipelines and UAT validation.

SELECTED PROJECTS

Kia Life | *React.js, Node.js, SQL Server, AWS, Unity*

- Awarded **1st place** in the KMX Kia Motors Innovation Challenge built a full-stack platform using React.js and Node.js recognized as the best solution by Kia Motors evaluators.
- Engineered a phased onboarding system with sequential task progression, dual-verification between employees and administrators, and automated email notifications to maintain alignment throughout the 3-month journey.
- Built Unity-based gamification where completing tasks on time unlocks virtual office items for a personalized pixel art workspace, paired with weekly leaderboards to drive team competition.

Horno 3 | *SwiftUI, SwiftData, Core ML, GPT-4, Supabase, Next.js*

- Built a SwiftUI museum companion app for Horno 3 (Parque Fundidora) featuring spatial navigation, AI content generation, and real-time backend synchronization in a unified modular architecture.
- Implemented interactive GeoJSON-based maps with dynamic route highlighting and Core ML image classification triggering GPT-4 contextual explanations when users scan exhibits.
- Integrated Supabase backend for news feeds with SwiftData offline persistence, plus a Next.js admin dashboard enabling staff to manage content and monitor visitor analytics in real time.

AION | *React, Node.js, Express, Python, PostgreSQL, OpenAI API*

- Built a web platform for AIOps workflow management, with a React frontend and Node.js/Express backend, centralizing system logs and monitoring infrastructure metrics through an interactive dashboard with visibility into operational events.
- Built MCP servers (Python) with dedicated tools per integration covering PostgreSQL log queries, Jira workflow actions, and Slack notifications, connecting a GPT-4o mini powered AI assistant to each service via MCP Use.
- Implemented role-based access control and designed CI/CD pipelines with environment configuration via Azure DevOps across development, staging, and production.

TECHNICAL SKILLS

Languages: Python, C++, C#, JavaScript, TypeScript, SQL (SQL Server, PostgreSQL, MySQL), Swift, HTML/CSS

Frameworks & Tools: .NET, React, Next.js, Node.js, Express, FastAPI, React Native, Expo, SwiftUI, Entity Framework, Tailwind, Git, Docker, Figma

Cloud Platforms: AWS
